# Water Management Policy Statement

Open GI is committed to ensuring the health, safety and welfare of its employees and contractors, and therefore recognises the need to maintain a safe and healthy environment for all individuals who use our facilities. We will therefore take all reasonable measures to establish an effective system to manage the risks associated with Legionella bacteria and, in accordance with the requirements of legislation and guidance, will:

- Appoint a person(s) to take responsibility, to control and manage the risk of exposure.
- Ensure all persons involved in the management and control of risk, or whose daily activity could impact on risk management controls, are deemed competent and provided with the relevant training where necessary.
- Implement a programme of routine inspections, tests and maintenance to ensure control measures remain in place and are effectively controlling the risk.
- Implement an assessment to remove, replace, minimise and/or control residual risks as required.
- Ensure the design of relevant services for new, refurbished or modified premises complies with the requirements of this document.

A handwritten signature in blue ink, appearing to read 'Simon Badley', located below the list of requirements.
